KLEIO ONE-SOLUTION

**Kleio One-Solution** takes a people-centric approach in all our business ventures. We believe that building a strong connection with people helps to break down doors and keep business relevant. Often, great businesses have a leadership that intricately understands the importance of this connection to the people and marketplace, enabling them to adapt to a constantly changing global landscape and find new industries that are in need of support. Currently, we oversee three corporate arms:

**Kleio Logistics** - with focus on supply chain and logistics

**Kleio + MediCare™** - which provides better patientcare through protective products and biomedical research

**Kleio TechX** - Digital Transformation Software Solutions

We build partnerships with our customers to facilitate optimum outcomes for their business.

## KLEIO ONE-SOLUTION

Kleio One-Solution was formed as a holdings company for Kleio Logistics, Kleio + MediCare™, and Kleio TechX. Though each entity is discrete in its services and day to day operations, One-Solution's empathetic philosophy is at the heart of what they represent. We are powered by 3 values:

We invest heavily in R&D to provide cutting-edge, innovative enhancements for you.

We are agile across multiple industries and communities, striving to provide value to all.

We believe in green, eco-sustainable growth, in a bid to do our part for the environment.

## Kleio + MediCare™

At Kleio + MediCare™, we help to improve the health of communities by providing healthcare products that meet the highest quality and compliance regulations.

Improvements in people's health result in a higher collective productivity and standard of living, leading to long-term, substantial and sustainable leaps in growth.

Using Singapore as a foothold and capitalizing on Singapore's extensive healthcare capacity, Kleio + MediCare™ is able to extend these high standards to an ASEAN outreach. Through substantial research and innovative, essential products, we hope to not only plug in gaps but also enhance care on a global scale.

Kleio + MediCare™ provides quality healthcare and the newest innovative products and research in the field.

### Examples of products:

Kleio + MediCare™ Respirator Masks  
 Surgical Masks  
 KN95 Masks  
 Hand sanitizers  
 Medical grade gloves  
 Surgical and medical gowns  
 Surgical tools and apparatuses  
 Patient beds  
 Orthopedic and surgical shoes and socks  
 Heart rate monitors

### Innovation and research:

Stem cell technology  
 Biotechnology  
 Life sciences  
 Medical apparatuses  
 Developing proprietary drugs for treatment of chronic conditions  
 Animal health medicines and vaccines  
 Vaccines production and research

Between the supply of respirator masks to meet unmet, urgent demands and heavy investments in Research and Development (R&D) into areas such as stem cell therapy, Kleio + MediCare™ aims to add value with a two-pronged approach:

#### Reactive:

We quickly recognize and gear production and resources towards solving immediate health-related needs of communities. When disaster pandemics or epidemics strike, demand for healthcare spikes and supply gets stretched; our substantial network of companies, suppliers, and stockpile allow for the capacity to adapt to changing market demands and situations. As such, we are able to handle orders of large quantities without compromise on quality.

#### Proactive:

Concurrently, to use a proactive lens and build health solutions for the next generation. Areas such as stem cell therapy, which uses stem cells to treat or prevent a disease or condition, offer an exciting wealth of possibilities. We also proactively send our products for accredited tests and certifications, so you can be assured of the highest quality.

## Kleio + MediCare™ Reusable Natural Latex Respirator Mask

Our Respirator Masks have been subjected to TÜV SÜD PSB testings to ensure that they conform to the highest international standards.

### Features & Benefits

BFE 99.96%  
 PFE(PM0.1) 95.3%  
 Fluid Resistance  
 Breathability Comfort  
 Microbial Cleanliness  
 Flame Resistant  
 Reusable  
 Formaldehyde-Free

### 4 Layers of Efficient Protection

The Four Layers of Kleio + MediCare™ Reusable Natural Latex Respirator Mask

#### Layer 1

Outermost layer - Microfibre  
 Extremely efficient in collecting and trapping bacteria and viruses. This durable, non-abrasive, & lightweight material is also self-cleaning if cared for properly, making the mask reusable up to 60 times

#### Layer 2

Made of a highly effective particle filter compound, the second layer is the mask's heavy-weight protection against harmful elements. Together with layer 3, the filter media is sewn into the central stratum of the mask

#### Layer 3

A natural latex material, synthetically made, it is off-touted for its unrivalled comfort. This material is also widely recognized for its conforming, cushioning & durable qualities, which allows the mask to provide complete coverage of the user's face. The WHO unilaterally recommends that all masks should be of good fit to effectively shield the user from viruses

#### Layer 4

A cotton cloth material forms the innermost layer, providing a comfort feel to the user. The material is also gentle and does not cause abrasions or irritation to the epidermis
